## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-7, 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Arsenault. Note that the position of the guard relative to the shaft is adjustable. See Fig 4.

Claims 1, 4-7, 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ezell.

Claims 1,4-7, 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sugihara et al.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Arsenault in view of Etchen. The rational of the last Office action is incorporated herein by reference.

Art Unit: 3724

Claims 3, 8, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ezell. The rational of the last Office action is incorporated herein by reference. Further adding adjusting holes which are old in the art would have been obvious.

Claims 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugihara et al. The rational from the last Office action is incorporated herein by reference.

### ***Conclusion***

Applicant argue for claim 1 by stating that a releasable clamp is now claimed. The art that is cited and applied to claim 1 shows releasable clamps. Applicant also argues that the limitation to a 90 degree shaft to guard angle defines over the art. It is noted that Arsenault and Sugihara are adjustable and therefor include a 90 degree angle and Ezell shows the angle in Fig 4.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
